SUMMARY

Aspiring AI engineer and Artificial Intelligence student at Poznan University of Technology with a passion for Machine Learning, Computer Vision, and Data Analysis. Enthusiastic about exploring how data-driven insights can improve decision-making and automation. Constantly learning and seeking opportunities to contribute to innovative AI solutions.

WORK EXPERIENCE

Capgemini

May 2025 - Current

Data Engineer/Data Science Intern

Poznań, Poland

- **Explored Agentic AI frameworks** for automating data migration workflows between heterogeneous databases. Designed multi-agent orchestration for schema extraction and migration validation. Delivered internal feasibility report comparing framework scalability, learning curve, and production readiness.

Stack: Python, N8N, Langflow, Autogen Studio, AWS Bedrock, Podman

- **Developed an agentic assistant for Data Science support** in Langflow, integrating RAG capabilities and multi-agent orchestration. Created a lesson-generation and podcast-conversion workflow leveraging Amazon Polly through a custom Python node.

Stack: Python, Langflow, AWS Bedrock, Amazon Polly, Podman

- **Built an automated ELT pipeline in Microsoft Fabric** for environmental analytics data. Modeled data in a medallion architecture and developed Power BI dashboards for trend analysis. Presented insights on correlations between economic growth and pollution intensity to the internal BI community.

Stack: Microsoft Fabric, PowerBI

EDUCATION

Poznan University of Technology

Oct. 2022 - Current

Bachelor, Artificial Intelligence

Poznań, Poland

PROJECTS

Image Search Engine

Developed an image search engine that retrieves similar images based on input queries using **embeddings** from deep learning models like **ResNet50** and custom **contrastive learning** models (e.g., Triplet Loss, Siamese Networks).

AI`nspired

Analyzed the influence of AI-generated versus web-sourced visual inspiration on the "Tram of the Future" design. Utilized **computer vision techniques** to assess similarities in color, contrast, and design, followed by **statistical analysis** to compare the two sources' impact on final design outcomes. Co-authored a peer-reviewed paper in **Educational Technology & Society (ET&S)**

SKILLS, TECHNOLOGIES, LANGUAGES & INTERESTS

- **Core Skills:** Machine Learning, Deep Learning, Computer Vision, Data Analysis, LLMs, Agentic AI, Git
- **Technologies & Tools:** Python, TensorFlow, PyTorch, OpenCV, Pandas, Power BI, Microsoft Fabric, R, AWS n8n, Langflow, AutoGen Studio
- **Soft Skills:** Collaborative Problem Solving, Critical Thinking, Data Interpretation, Insight Communication
- **Languages:** Polish (Native), English (C1)
- **Certificates:** DP-600: Microsoft Certified Fabric Analytics Engineer Associate
- **Interests:** Alternative Coffee Brewing Methods, Discovering New Music, Fantasy Books, Musical Theater
