

MARCEL ROJEWSKI

AI & Data Engineer

@ rojewskimarcel@gmail.com +48 660 462 658 Poznań, Poland <https://marcelrojo.github.io/>

EXPERIENCE

Site Reliability Engineer (SRE) Intern Google

July 2026 – Present Warsaw, Poland

AutoTriager – Autonomous Agentic Incident Triaging

- Architected an end-to-end incident investigation pipeline reducing estimated triage time by ~40% by automatically correlating real-time alerts with historical incidents, playbooks, and active known issues.
- Engineered ETL pipelines transforming unstructured operational telemetry into structured relational stores; designed **symmetric payload embeddings** (service, title, error summary) to maximize query-document similarity.
- Designed a **two-tiered retrieval architecture**: pre-loads top-candidate summaries into the LLM session context cache while dynamically fetching raw logs and telemetry via **agent tool calling**.
- Developed an offline **Reviewer Agent** evaluation framework backtested against a month of historical incidents (with strict pre-incident knowledge cutoffs) to benchmark triage accuracy against ground-truth engineer annotations.

Data Engineer / Data Science Intern Capgemini

May 2025 – May 2026 Poznań, Poland

Serverless AWS Data Pipeline

- Led a team of 2–4 engineers delivering an event-driven serverless pipeline parsing S3 files, integrating external APIs, and routing to analytical stores.
- Provisioned infrastructure as code via **Terraform (IaC)**, configuring **AWS Lambda, DynamoDB, S3, Athena, Glue, SQS, and SNS** within dedicated VPC boundaries.
- Managed daily client communications to align technical deliverables and schema designs with enterprise business requirements.

Agentic AI Solutions & Multi-Agent Orchestration

- Architected multi-agent orchestration workflows (**Langflow, n8n, AutoGen Studio**) to automate heterogeneous database migrations.
- Engineered an agentic Data Science assistant featuring RAG document synthesis, automated lesson generation, and audio conversion via **AWS Bedrock** and **Amazon Polly**.

EDUCATION

M.Sc. in Artificial Intelligence Poznan University of Technology

March 2026 – June 2027 (Expected)
Poznań, Poland

B.Sc. in Artificial Intelligence Poznan University of Technology

Oct. 2022 – Feb. 2026
Poznań, Poland

PUBLICATIONS

AI'nspired | Researcher & Co-Author

Educational Technology & Society (ET&S)

Quantified visual inspiration in transportation design using computer vision metrics (color and contrast) and statistical analysis. Co-authored peer-reviewed journal paper.

SKILLS & TECHNOLOGIES

Python

Agentic AI

RAG

Context Caching

Vector Embeddings

LLM Evaluation

Terraform (IaC)

AWS Lambda

DynamoDB

S3

Athena

Glue

Docker

Git

PyTorch

TensorFlow

OpenCV

Pandas

AWS Bedrock

n8n

Langflow

AutoGen Studio

LANGUAGES

- Polish – Native
- English – C1 Advanced (Professional)

SOFT SKILLS

Collaborative Problem Solving

Critical Thinking

Data Interpretation

Insight Communication
